education

- 2022 - 2024 **UNIVERSITY OF MASSACHUSETTS, BOSTON** **BOSTON, MA**
Master of Science in Computer Science, May 2024. Teaching Assistant, Computer Architecture and Organization, supported 60+ students. President, Sustainable Energy Club. Event Organizer, Desi Student Club.
- 2016-2020 **St. JOSEPH's COLLEGE OF ENGINEERING,** **CHENNAI, INDIA**
Bachelor of Engineering in Computer Science and Engineering. Vice President, Tech Club. Top 300, Infosys Global Hackathon. Student Mentor for Placement Training (Voted Best Mentor), mentored 20+ students.

experience

- 2022 - present **BRIGHT HORIZONS FAMILY SOLUTIONS** **NEWTON, MA**
DevOps Engineer
Coordinated and executed regular production release deployments (weekly/bi-weekly), maintaining 99%+ on-time delivery for critical applications.
- Automated DevOps processes using AI-driven agentic workflows, reducing manual CI/CD effort by ~40% and shortening lead time for changes from days to <1 day where adopted.
 - Designed and deployed MCP servers with custom developer agents integrated into GitHub Copilot, boosting developer productivity and code suggestion adoption across a team of 20+ engineers.
 - Conducted recurring chaos engineering experiments quarterly to validate disaster recovery and fallback services, helping to detect and remediate resilience gaps before impacting users.
- 2019-2022 **ZOHO CORPORATION** **CHENNAI, INDIA**
Cloud Developer
Coordinated scheduled disaster recovery (DR) site switchovers on a quarterly basis, contributing to 99.9%+ uptime targets and business continuity assurance
- Refactored F5 NGINX load-balancing logic to route traffic based on custom request headers, improving request distribution efficiency and reducing latency for high-traffic services by an estimated 10–15%.
 - Architected and implemented an Inventory Configuration Comparison framework to automatically detect drift between production and DR environments, cutting configuration discrepancies by ~80% and reducing manual audit effort.
 - Contributed to the in-house cloud management console by resolving high-priority bugs and delivering feature enhancements, improving internal user satisfaction and reducing support tickets for the tool.
- summer 2019 **ZOHO CORPORATION** **CHENNAI, INDIA**
Intern
- Built a full-stack web application with a Java backend, vanilla JavaScript frontend, and MySQL database to manage internal data, improving visibility and reducing manual tracking.
 - Performed end-to-end analysis of F5 NGINX behavior under different configurations, creating recommendations for future customization and performance optimization.

skills

Cloud & DevOps: AWS, Azure, Docker, Kubernetes, Terraform, GitHub Actions, Azure DevOps; Programming: Python, Java, Bash; Web & Infra: NGINX, F5, Linux, SQL.

projects

Built ML-driven prediction and full-stack productivity apps, including a heart-disease risk classifier, a cross-platform Flutter/Firebase task tracker, and a web-based church meeting and payments manager.

community

Open-source contributor on GitHub (CI/CD utilities, Terraform modules). Mentored junior engineers on DevOps tooling and cloud best practices. Active participant in local Boston tech meetups. Active Boston Cares volunteer.

personal

Interests: cloud infrastructure, AI/ML engineering, car modifications, gaming (Gran Turismo 7), and road trips.
